A Matter of Taste: It's Only Water

Division: Life Sciences / Environmental Innovation

Category: Junior

Region: Yukon/Stikine

City: Whitehorse, YT

School: F. H. Collins

Abstract: This project tested if people could taste the difference between tap water and bottled water. I tested 26 different people and asked them to rate the water taste from 1 to 10. I also asked if they could guess which water out of the 6 samples was which brand or if it was tap. The results showed that people can't taste the difference.

Biography

My name is Talia Noelle Woodland, I'm thirteen and I'm in grade eight. I love sports, so I joined the girls basketball team and helped take our team to the gold medal. I love to snowboard and play lots of sports. I play percussion in grade eight advanced band and I play guitar for fun. Last summer me and some of my family hiked the Chilkoot. I love the outdoors and anything adventurous. Since I'm always looking for a challenge I take breakdancing classes at the local dance studio. I really enjoy them and I love to listen to music.
