

Helping to Make Science
& Technology Fun!

Your Science
Connection

Science Adventures

YOU Are A Valuable Yukon Resource Worth Tapping Into!

Science Adventure (SA)

volunteers bring science and technology expertise into the classroom (and beyond)!

More to the point, **SA** volunteers put the fun and creativity back into class subjects that are often thought of as "dry" and "unimportant."

Students are exposed to the real lives, and thoughts, of biologists, engineers, geologists, health technologists, chemists, computer programmers... You name it! We are only limited by the requests of Yukon teachers and the availability of volunteers.

SA volunteers are positive role models for children - they dispel the myth that people working in the science and technology field are "stuffy" and "unapproachable".

Perhaps, the best part of becoming an **SA** volunteer is that you will be energized and inspired to pursue your own work and life commitments.

Call the **Science Adventures** program for more information:

867.668.8739

Complete and return the Information Form found at:
www.scienceadventures.ca

SA volunteers can energize & educate students about...

- Forestry
- Environmental songs
- Geology
- Wildlife
- Nutrition
- Astronomy
- Engineering
- You name it and we will let teachers know it is available!

Ways to get involved as an Science Adventure volunteer...

- 1 Visit a classroom to share details of your job or an area of science & technology that excites you.
- 2 Become a judge for either the Bridge Building Competition or School/Regional Science Fairs.
- 3 Act as a mentor at a planned Career Day Event.
- 4 Have a student (or a class) come to work with you (job shadowing).
